Lahore, Pakistan

Profile

With over 2 years of experience in modern web development, I am a dedicated software engineer specializing in frontend development with React.js and Next.js. I bring a strong skill set in creating compelling user interfaces and seamless user experiences. My commitment to leveraging the power of code to address real-world challenges is evident in my work. Thriving in dynamic environments, I've built a proven track record of successful results, particularly in the context of front-end development. My passion lies in contributing to the evolution of the web by crafting intuitive and efficient user interfaces and viewing information technology as a pivotal tool in addressing global challenges.

Strengths & Skills

- ✓ Reactjs
- ✓ JavaScript
- ✓ Redux
- ✓ Antd
- ✓ Github

- ✓ Next js
- ✓ Python
- ✓ Firebase
- ✓ Scss
- ✓ GitLab

- ✓ TypeScript
- ✓ Jest js
- ✓ Tailwind Css
- ✓ Figma
- ✓ Jira

Education

MS Computer Science Bahria University Lahore, 2022 | 3.4 CGPA

BS Software Engineering Comsats University Islamabad Sahiwal, 2019 | 2.8 CGPA

Experience (2 Years)

Associate Software Engineer

April 2022 - Present

Techana

Lahore, Pakistan

- Created high-quality mockups and prototypes translating customer needs into functional and appealing interactive applications.
- Re-engineered style guide components for speed, maintainability, and accessibility.
- Mobile First development
- Daily scrum meeting with the team to discuss new tasks and blockers in the previous task
- Design templates
- Integrate the Rest APIs in webpages
- Write reusable components & extendable code
- Exploring and adopting new tools, libraries, and methodologies to improve development processes.

Projects

Fayvox (www.fayvox.com)

Fayvox Experiences is a sub-brand of the social app called Fayvo. Fayvo is a social platform to keep everything organized, safe, and shareable while Fayvo X is a planned journey that allows its users to enjoy a variety of experiences in different fields within the city of Saudi Arabia.

- Developed visually appealing and user-friendly UI design for a hosted dashboard, ensuring a seamless user experience.
- Created responsive designs for various websites, ensuring optimal user experience across different devices and screen sizes.
- Utilized HTML, SCSS, and media queries to build fluid layouts that adapt seamlessly to mobile, tablet, and desktop screens.
- Worked with backend developers to understand API documentation and requirements, ensuring smooth integration and proper data handling.

Fayvo (web.fayvo.com)

Fayvo is a social media app that allows users to share their favorites and discover the favorites of others. It features a marketplace where creatives can sell their work and services, a portfolio builder where creatives can showcase their work, a job board where creatives can find freelance and full-time opportunities and a community forum where creatives can connect with each other and collaborate.

- Conducted extensive testing on different devices and browsers to ensure consistent rendering and functionality.
- Worked as a part of an Agile team in the development of a user experience application.
- Staying up-to-date with the latest trends and advancements in React.js and front-end development.

Youhue (youhue.com)

YouHue strives to create a safe environment for children to freely express themselves, recognizing the immediate benefits of guided self-expression for emotional well-being. By helping students recognize triggers and prompts to check in with their emotions, YouHue empowers a new generation to thrive in all aspects of life, feeling acknowledged and equipped with essential skills.

- Designing and implementing reusable and modular components.
- Following best practices for component state management and props handling.
- Implementing stateful and stateless components as per the application's requirements.
- Handling complex data flows and asynchronous operations using appropriate patterns.

RESERVAL (www.reserval.com)

Reserval is a travel booking website that allows users to book flights and hotels. The website is available in English, Arabic, and Spanish. Reserval partners with various airlines and hotels to offer users the best possible prices. The website also offers a variety of features to help users plan their trips, such as a flight search engine, a hotel search engine, and a price comparison tool.

Reserval Business

Techana

- An enterprise-level B2B portal designed to provide in-house flights and hotel reservations all over the world.
- Developed the admin and traveler portal (with PHP Laravel and NextJS) to enable the business to manage traveler reservations.
- Designed the architecture of user-specific roles and permissions.
- Optimized page loading and rendering for exceptional performance.
- Developed a dynamic frontend using NextJS which allows clients to customize the website according to their specifications.
